Rahul and Rashi are off to the wedding of a close relative. This time they have to travel without their guardians. Rahul got very interested in the arrangement of seats inside the train coach.

The entire coach could be viewed as an arrangement of consecutive blocks of size 8.

Berth Number Compartment

1 - 8	1
9 - 16	2
17 - 24	3
... and so on	

Each of these size-8 blocks are further arranged as:

1LB, 2MB, 3UB, 4LB, 5MB, 6UB, 7SL, 8SU
9LB, 10MB, ...
...
...

Here LB denotes lower berth, MB middle berth and UB upper berth.

The following berths are called **Train-Partners**:

3UB		6UB
2MB		5MB
1LB		4LB
7SL		8SU

and the pattern is repeated for every set of 8 berths.

Rahul and Rashi are playing this game of finding the train partner of each berth. Can you write a program to do the same?

Input

The first line of input contains a single integer **T**, denoting the number of test cases to follow.

Each of the next **T** lines contain a single integer **N**, the berth number whose neighbor is to be found out.

Output

The output should contain exactly **T** lines each containing the berth of the neighbor of the corresponding seat.

Constraints

Subtasks

Subtask #1 (50 points):

- 1 ≤ T ≤ 8
- 1 ≤ N ≤ 8

Subtask #2 (50 points):

- 1 ≤ T ≤ 100
- 1 ≤ N ≤ 500

Example

Input:
3
1
5
3

Output:
4LB
2MB
6UB

CodeChef - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of algorithms, **computer programming** and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and another smaller programming challenge in the middle of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

Practice Section - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in a language of your choice. Our **programming contest** judge accepts solutions in over 35+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

Compete - Monthly Programming Contests and Cook-offs

Here is where you can show off your **computer programming** skills. Take part in our 10 day long monthly **coding contest** and the shorter format Cook-off **coding contest**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
